

Stay Vigilant, Stay Safe

We've all been working hard to protect ourselves, co-workers, members and patients from COVID-19. But the threat persists. Rounding for safety can help you and your team identify risks and take action to make the workplace safer. Follow these steps to make sure your team keeps up the fight.

Wear a mask.

Safely remove personal protective equipment (PPE) to avoid contaminating yourself.

Sanitize or wash your hands often for at least 20 seconds.

Keep your distance — stay at least 6 feet apart from others.

Don't touch your face.

Clean and disinfect objects and surfaces you touch often.

TIPS FOR SUCCESS

1. Engage your co-workers in a conversation about safety. Ask them, *“Are we doing everything we can to prevent the spread of COVID-19? What steps can we take to protect ourselves and patients?”*

2. Write down their answers, using the space below.

3. Evaluate the responses and choose one issue to discuss with your unit-based team co-leads. It could become your next UBT project!

4. Follow up. Set a timeline to complete the project and inform those involved of your results.
